

A220 Paint dock

CUSTERS

Aluminium Scaffolding

Service & Maintenance

Ground Support Equipment

Custers Aviation

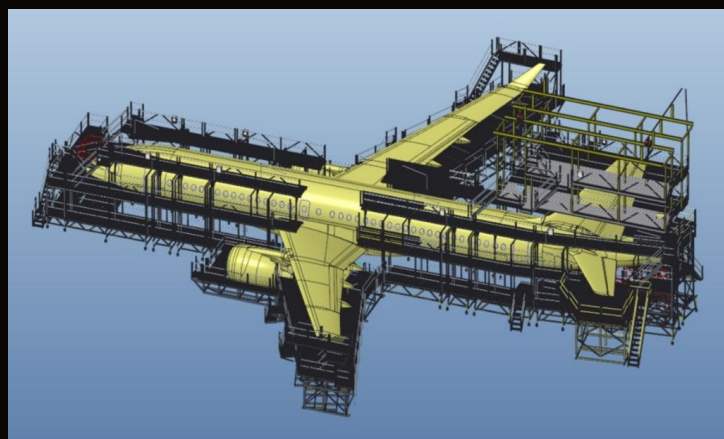

More than 30 years of experience!

This paintdock is suitable for the A220 aircraft.

It has steel undercarriage frame with aluminium frame-sections. The complete aircraft can be reached easily to do all the paint work. It consists of cockpit, fuselage, wing, engine and tail dock-sections. The tail-dock is a hanging dock attached to the ceiling of the hangar.

The paintdock is mobile and is easy to manoeuvre, which make a quick docking an aircraft possible. All sections are designed to the applicable safety standards for workshops and are meeting the current safety standards EN 1915, EN 12312-8, as far as it is applicable for this access equipment.

The assembly of the paintdock can be done by yourself based on detailed 3D-images and manual. Once completely installed, a Custers supervisor will come to check and approve the paintdock.

Specifications

Type:	Paint docks
Conditions:	Inside use only
Step width:	600mm
Stair angle:	50 degrees
Mass:	37.300 KG
Class:	EN 12312-8 OSHA
Max load:	500 kg

Safe access
