Mobile Maintenance Stand for EH101 – Compact, Lightweight & Fully Accessible Precision-engineered for EH101 internal access, mobility, and operator safety.

This high-performance maintenance stand is designed to provide unmatched access and efficiency inside the EH101 fuselage. With a fixed platform height of 1400mm, a spacious 3500mm width (between handrails), and a 4000mm total length, it offers a generous and stable working area.

Key Features:

- **Compact & Mobile Design:**
The stand can be easily rolled into the EH101 cargo bay through the ramp door in its lowest position—with fold-down handrails allowing entry without dismantling.
- **Full Internal Access:**
Once in place, technicians can work around the entire interior fuselage without repositioning the stand, streamlining maintenance tasks and reducing downtime.

- **Optimized Stair Access:**
A centrally located stairway at the rear offers safe and convenient access to the platform. The 45° stair slope complies with project specifications (note: deviates from EN12312-8 for operational efficiency).
- **Durable, Lightweight Construction:**
- **Aluminium tear plate flooring with drainage** ensures a safe, non-slip work surface.
- **Built with lightweight materials**, the entire unit can be maneuvered by just four persons.

Designed for mobility. Engineered for access. Built for the EH101.

Specifications

Type:	Maintenance stand
Conditions:	In- and outside use
Dimensions (transport):	360 x 6800 x 2600
Platform height:	Varies
Platform dimensions:	3500 x 4100
Step width:	800mm
Stair angle:	Varies
Mass:	905 kg
Class:	EN 12312-8
Max load:	250 kg/ m2

Safe access
