ADJUSTABLE MAINTENANCE DOCK FOR EH101

Modular Access. Maximum Flexibility.
Precision Maintenance.

Support your ground crew with a fully adjustable, multi-section dock system engineered specifically for the EH101. This complete solution ensures safe, efficient, and obstruction-free access to all critical maintenance zones.

- Dock Configuration Includes:
- Left-Hand & Right-Hand Nose Sections
- Left-Hand & Right-Hand Body Sections
- Left-Hand & Right-Hand Tail Sections
- Tail Rotor Section

* Height Adjustable for Total Flexibility
The full dock is adjustable up to 70 cm via a robust parallel connection mechanism built into the platform base—offering seamless alignment to the helicopter's varying contours and maintenance needs.

* Full Access Without Compromise

Each platform is designed to allow unrestricted access to doors, access panels, and vital components—without obstructing jack points or lift operations.

* Custom-Built, FOD-Free Design

Every section is tailored for a precise fit around the EH101, built with FOD-free materials and protective rubber edges where necessary to prevent accidental contact damage.

* Indoor & Outdoor Compatibility

Constructed with durability in mind, this dock is suited for both hangar and outdoor operations, ensuring performance in any maintenance setting.

Specifications

Type:	Maintenance dock
Conditions:	In- and outside use
Dimensions (transport):	-
Platform height:	Adjustable
Platform dimensions:	-
Step width:	800mm
Stair angle:	45 degrees
Mass:	± 5650 kg
Class:	EN 12312-8
Max load:	200 kg/ m2
