Versatile Maintenance Dock for EH101 Helicopter
Efficient. Safe. Built to Last.

Our advanced EH101 maintenance dock is designed with functionality, safety, and versatility in mind. Featuring a fixed platform height, the system includes both left-hand (LH) and right-hand (RH) long and short platforms, which can be seamlessly connected and accessed via integrated stairways.

Key Features:

- **Optimized Access:**
The long platform includes three adjustable flaps for streamlined entry to the cargo door, and a removable trapdoor for direct access to the primary hoist—securely storable on the guardrail.
- **Specialized Functionality:**
The short platform offers two dedicated trapdoors:
- One opens up to 90° for safe rotor blade maintenance, with a locking system to prevent drops or accidents.

The other provides easy access to the secondary hoist, and can also be fully removed and secured on the guardrail.

- Built for Safety & Durability:
- FOD-free design minimizes risk of foreign object damage.
- Protective rubber fittings at critical contact points.
- Suitable for indoor and outdoor use in varied operational environments.

Streamline your EH101 maintenance operations with a dock that prioritizes safety, access, and durability.

Specifications

Type:	Maintenance dock
Conditions:	In- and outside use
Dimensions (transport):	-
Platform height:	2900mm
Platform dimensions:	-
Step width:	800mm
Stair angle:	50 degrees
Mass:	± 1350 kg
Class:	EN 12312-8
Max load:	200 kg/ m2
